In this second edition of Human Relationship Skills the author demonstrates how such skills can be learnt, encouraging readers to accept responsibility for developing them and putting them into practice. New to this edition are chapters on what the reader brings to relationships, on choosing relationships and on strengthening them, reflecting the emphasis on people working together rather than alone. This theme is backed up by exercises and suggestions for personal experiments throughout the book which can be worked through by readers on their own, in pairs or in groups.

Algebra (ENHANCED ebook) Points, Lines, Angles, and Planes Geometry

The activities in this book are designed to provide students with practice in the skill areas required to understand basic geometry concepts. The focus is on congruence and similarity, classifying various kinds of angles and triangles, transformations, parallel and perpendicular lines, properties of geometric figures, arcs and chords, and finding surface area and volume.

CCSS 7.G.B.5 Solving for Unknown Angles Lorenz Educational Press

A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
