Two women searching through a secret past discover that their brief hotel liaison is only the beginning. Laurel Hoffman, an associate professor of women's studies in Berkeley, struggles to stay on track for tenure while caught up in the last throes of a crumbling relationship with a senior colleague. When she hears of a hotel being renovated and a secret room full of papers about women who once stayed there, she knows she has a potential

career-saving article. Stefanie Beresford, the hotel owner, is not exactly receptive when Laurel approaches her about researching the hotel's history, but that doesn't stop her from flirting with the alluring academic. She doesn't need the distraction, but for the first time in her life she wants to take a chance on more than a fleeting encounter. While Laurel can't deny her powerful feelings for Stefanie, she fears she's risking her heart as well as her future if she acts on her desires. But can a simple encounter between two rational adults really be all that dangerous?

Is true greatness obtainable from everyday means and everyday genes? Conventional wisdom says no, that a lucky few are simply born with certain gifts. The new science of human potential suggests otherwise. Forget everything you think you know about genes, talent, and intelligence, and take a look at the amazing new

evidence. Here, interweaving cutting-edge research from numerous scientific fields, David Shenk offers a new view of human potential, giving readers more of a sense of ownership over their accomplishments, and freeing parents from the bonds of genetic determinism. As Shenk points out, our genes are not a “blueprint” that dictate individual destinies. Rather we are all the product of interplay between genes and outside stimuli—a dynamic that we can influence. It is a revolutionary and life-changing message.
