Kim Mark Lewis
Bringing together the work of sixteen international Japan specialists and scholars, this book analyzes Japan's culture and history to reflect on the critical policy decisions and national commitments required for the country to continue to succeed. Comparing the current situation with the uncertainties of the late nineteenth century, this book investigates the possibility and desirability of a "New Meiji Transformation" in Japan.

Set in the context of perceived demographic, ecological, fiscal and political decline in Japan, it explores what a New Meiji initiative would look like in the twenty-first century and whether a new era of renewal is needed to maintain and improve quality of life. An interdisciplinary volume, this book covers contemporary issues in Japanese foreign, defense and nuclear strategies, as well as its aging population, higher education structure and environmental policies. As such Japan's Future and a New Meiji Transformation will be of great interest to students and scholars of Japanese politics, economics and history, as well as Asian Studies more generally.

Since 1492, the distinct cultures, peoples, and languages of four continents have met in the Caribbean and intermingled in wave after wave of post-Columbian encounters, with foods and their styles of preparation being among the most consumable of the converging cultural elements. This book

traces the pathways of migrants and travellers and the mixing of their cultures in the Caribbean from the Atlantic slave trade to the modern tourism economy. As an object of cultural exchange and global trade, food offers an intriguing window into this world. The many topics covered in the book include foodways, Atlantic history, the slave trade, the importance of sugar, the place of food in African-derived religion, resistance, sexuality and the Caribbean kitchen, contemporary Caribbean identity, and the politics of the new globalisation. The author draws on archival sources and European written descriptions to reconstruct African foodways in the diaspora and places them in the context of archaeology and oral traditions, performance arts, ritual, proverbs, folktales, and the children's song game "Congotay." Enriching the presentation are sixteen recipes located in special boxes throughout the book.

'This is a splendidly fresh and clear account of the main political events in England between the Norman Conquest and King John's Magna Carta.' Michael Clanchy FBA, Emeritus Professor of Medieval History at the Institute of Historical Research, University of London 'Lucid and perceptive, striking an effective balance between primary and secondary authorities, Huscroft's book is both a significant statement in its own right and an ideal introduction to other work in the field.' Professor David Carpenter, Kings College London 'Ruling England' is about the exercise of political power in England at a time of formative change in the country's history. Framed at one end by the Norman Conquest and at another by Magna Carta, it describes what happened, why and with what consequences in politics, government, law and the church. It analyses developments from a royal perspective and focuses on the policies and priorities of the English kings, the limitations of the political system within which they operated, and the efforts they made to expand

their power. It explains how the ruler of the most sophisticated kingdom in twelfth century Europe was eventually compelled to submit to the humiliation Environments & Operations International Business, Global Edition For courses in international business.  With the growth of international business and the rise of companies with subsidiaries around the world, the question of where a company should file bankruptcy proceedings has become increasingly complicated. Today, most businesses are likely to have international trading partners, or to operate and hold assets in more than one country. To execute a corporate restructuring or liquidation under several different insolvency regimes at once is an enormous and expensive challenge. With *International Bankruptcy*, Jodie Adams Kirshner explores the issues involved in determining

which courts should have jurisdiction and which laws should apply in addressing problems within. Kirshner brings together theory with the discussion of specific cases and legal developments to explore this developing area of law. Looking at the key issues that arise in cross-border proceedings, *International Bankruptcy* offers a guide to this legal environment. In addition, she explores how globalization has encouraged the creation of new legal practices that bypass national legal systems, such as the European Insolvency Framework and the Model Law on Cross-Border Insolvency of the United Nations Commission on International Trade Law. The traditional comparative law framework misses the nuances of these dynamics. Ultimately, Kirshner draws both positive and negative lessons about regulatory coordination in the hope of finding cleaner and more productive paths to wind down or rehabilitate failing international companies.

 The availability of effective global communication facilities in the last decade has changed the business goals of many manufacturing enterprises. They need to remain competitive by developing products and processes which are specific to individual requirements, completely packaged and manufactured globally. Networks of enterprises are formed to operate across time and space with world-wide

distributed functions such as manufacturing, sales, customer support, engineering, quality assurance, supply chain management and so on. Research and technology development need to address architectures, methodologies, models and tools supporting intra- and inter-enterprise operation and management. Throughout the life cycle of products and enterprises there is the requirement to transform information sourced from globally distributed offices and partners into knowledge for decision and action. Building on the success of previous DrrSM conferences (Tokyo 1993, Eindhoven 1996, Fort Worth 1998), the fourth International Conference on Design of Information Infrastructure Systems for Manufacturing (DrrSM 2000) aims to:

- Establish and manage the dynamics of virtual enterprises, define the information system requirements and develop solutions;
- Develop and deploy information management in multi-cultural systems with universal applicability of the proposed architecture and solutions;
- Develop enterprise integration architectures,

methodologies and information infrastructure support for reconfigurable enterprises;

- Explore information transformation into knowledge for decision and action by machine and skilful people;

These objectives reflect changes of the business processes due to advancements of information and communication technologies (ICT) in the last couple of years.
