Without the close, there is no sale. Pretty obvious, right? Yet, for many salespeople, closing is the most baffling and elusive part of the selling process. All too often, salespeople meet qualified clients and charm them with an eloquent presentation, only to see the sale mysteriously slip from between their fingers in the end. Which is sad when you consider all the hard work - the prospecting, preparation, planning, and practice - done for the sake of a moment of truth that never arrives. Fortunately, closing is an art that can be mastered, and now Sales Closing For Dummies shows you how. Packed with powerful principles that can help you become a top-producing salesperson, Sales Closing For Dummies is the ultimate guide to mastering that

most mysterious part of the selling equation. Tom Hopkins, the legendary sales genius who, by age 30 was the nation's leading real-estate trainer, demystifies closing and shows what it takes to be a champion closer, including how to: Lead a sale without being pushy Read the signs of an interested potential buyer Use questioning methods that close sales, time and again Help clients feel good about their buying decisions Keep your clients' business and build their loyalty Build long-term relationships and watch your sales grow With the help of dozens of real-life examples from a wide cross section of industries, Tom shows why professional selling is about communication, not coercion. And he shares his considerable insight and experience on: Verbal and visual buying cues and how to recognize them Choosing the best location for closing Addressing concerns and creating a sense of urgency Time-tested tactics and strategies for ending customer procrastination, overcoming their fear, closing from a distance, and more The ten biggest closing mistakes and how to avoid them Add-on selling and other ways of getting your clients to help you to build your business Featuring Tom's Hopkins' trademark "Red Flag" key points and situation scripts, this fun, easy-to-understand guide arms you with the hands-on tools and techniques you'll need to become a world-class closer.

The chapter structure remains the same: the first part consists of pairs of chapters that explain the mechanisms involved and how they regulate gene expression, and the second part deals with specific biological processes (including diseases) and how they are controlled by genes. Coverage of methodology has been strengthened by the inclusion more explanation and diagrams.The significant revision and updating will allow Gene Control to continue to be of value to students, scientists and clinicians interested in the topic of gene control.

Mind-opening writing on what kids need from school, from one of education's most outspoken voices Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him "perhaps the country's most outspoken critic of education's fixation on grades [and] test scores." Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn's unmistakable voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question "Why Self-Discipline Is Overrated." And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both punishing and praising children for what they do instead of parenting "unconditionally." Whether he's talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought. This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a refreshing perspective on today's debates about kids and schools.
